Why Mass Transit

Mass transit is growing at an astonishing rate in many highly populated cities across the globe. With the rise in population within these cities it's likely the transit area and components are greatly utilized. With the growing rate of use comes a growing challenge of vandalism and graffiti.

Challenges

- Receives regular audits to ensure the facilities and utilities are maintained and graffiti free
 - Continuous vandalism to the surfaces within the transit area
 - Decreased revenue due to high amounts of vandalism in public view
 - Feeling of insecurity due to vandalism
-

About Graffiti Shield

Manufacturers of surface protection solution products for glass, metal, and solid surfaces. Graffiti Shield specializes in precut anti-graffiti films for public and private spaces. Graffiti Shield was founded in early 2013, but has decades of experience manufacturing and installing protective films leading up to the launch of a very seasoned company from day one. It has been recognized that the graffiti control market has been only partially serviced and supported by individual facets or companies for different areas of concern. We saw a need from clients for a holistic graffiti control/abatement for all of their needs. Thus Graffiti Shield was born.

We Can Help

Graffiti Shield offers a wide variety of protective and finished products. We recognize the value of keeping properties clean and free of vandalism while providing protection to the surface underneath.

- Improves the look of aged and vandalized surfaces without having to replace or discard
- Maintain or increase revenue by having a graffiti free space
- Proprietary adhesive that cleanly releases from the surface, but withstands removal attempts from public
- Printable for advertising, company messages, employee messages, and decorative touches
